SEO SCORE	PASSED CHECKS	FAILED CHECKS	WARNINGS

COMMON SEO ISSUES

Meta Title	✔ The meta title of your page has a length of 62 characters. Most search engines will truncate meta titles to 70 characters. → Albany laser -Canada, for beautiful, youthfull and better look
Meta Description	✔ The meta description of your page has a length of 156 characters. Most search engines will truncate meta descriptions to 160 characters. → Albany laser is the best place in Canada which helps you to be Beautiful and youthful,We have treatment for all skin types and we can give you a better look
Google Search Results Preview	ⓘ Albany laser -Canada, for beautiful, youthfull and better look https://albanylaser.ca Albany laser is the best place in Canada which helps you to be Beautiful and youthful,We have treatment for all skin types and we can give you a better look
Most Common Keywords Test	ⓘ There is likely no optimal keyword density (search engine algorithms have evolved beyond keyword density metrics as a significant ranking factor). It can be useful, however, to note which keywords appear most often on your page and if they reflect the intended topic of your page. More importantly, the keywords on your page should appear within natural sounding and grammatically correct copy. → albany - 12 times → centre - 9 times → body - 9 times → cosmetic - 9 times → laser - 9 times
Keyword Usage	ⓘ Congratulations! You are using your keywords in your meta-tags, which help search engines to properly identify the topic of your page. ✔ Keyword(s) included in Title tag ✔ Keyword(s) included in Meta-Description tag

Keywords Cloud	ackgroundsize:cover;mozbackgroundsize:cover;obackgroundsize:cover;backgrounds admin albany albanylaser/videos/vb.//?type=&theater apply appointment april body book booking botox carbon center centre comment community consultation contouring cosmetic databgurl datashowtext="false">carbon datawidth date decision dermal difference doll dulthera ebla edmonton email excited experience facebook facelift featured fillers finance financial fractional free friday fusion growing hair health home injection instantly june laser lesions march mask medical melasma microdermabrasion microneedling number online ottom payment peel phone pigmentation plan plasma plateletrich posted posts questions radiofrequency rate removal required reserved rights service services shaping shiny sixmonth skin stage sunday tattoo technologies thrilled tightening time today top:;marginbottom:; tuesday ulthera vampire vascular videos walkin wednesday zero
<h1> Headings Status	Your page contains many H1 tags. H1 tags should re-inforce the intended topic of your page to search engines - too many tags may make the topic less clear, or look like spam tactics. Consider using less than 5 H1 tags. The current H1 tags are listed below: → Hair Removal → Microdermabrasion → Skin Tightening → Body Contouring → Botox Injection → Dermal Fusion → Microneedling Fractional Radiofrequency → Body contouring and Three stage body shaping → Platelet-Rich Plasma (PRP) → Dermal Fillers → Carbon Peel → Tattoo and Pigmentation Removal → Vascular Lesions → Melasma → DUlthera
<h2> Headings Status	✔ Your page contains H2 headings. Their contents are listed below: → Albany Cosmetic and Laser Center → The Difference In Experience → Our Services → Featured Videos → Facebook Posts → Have Questions? Book an Appointment or A Free Consultation Today!
Robots.txt Test	✔ Congratulations! Your site uses a "robots.txt" file: https://albanylaser.ca/robots.txt
Sitemap Test	✔ Congratulations! We've found 3 sitemaps files for your website: → https://albanylaser.ca/sitemap.xml → https://albanylaser.ca/sitemap_index.xml → http://albanylaser.ca/sitemap.xml
Broken Links Test	✔ Congratulations! We have checked 24 links on this web page and none of them are broken.

SEO Friendly URL Test	✔ Congratulations! All links from your webpage are SEO friendly.
Image Alt Test	! Your webpage has **11** 'img' tags and **2** of them are missing the required 'alt' attribute. **HOW TO FIX IMAGE ALT TEST** In order to pass this test you must add an **alt** attribute to every **<img>** tag used into your webpage. An image with an alternate text specified is inserted using the following HTML line: `<img src="image.png" alt="text_to_describe_your_image">` Remember that the point of alt text is to provide the same functional information that a visual user would see. Search engines, users who disabled images in their browsers and other agents who are unable to see the images on your webpage can read the alt attributes assigned to the image since they cannot view it. Learn more about optimizing images for SEO.

Inline CSS Test	✖ Your webpage is using **68** inline CSS styles!
	
	HOW TO FIX INLINE CSS TEST
	It is a good practice to move all the inline CSS rules into an external file in order to make your page "lighter" in weight and decrease the code to text ratio.
	• check the HTML code of your page and identify all style attributes
	• for each style attribute found you must properly move all declarations in the external CSS file and remove the style attribute
	For example:
	
	`<!--this HTML code with inline CSS rule:-->`
	`<p style="color:red; font-size: 12px">some text here</p>`
	
	`<!--would became:-->`
	`<p>some text here</p>`
	
	`<!--and the rule added into your CSS file:-->`
	`p{color:red; font-size: 12px}`

Deprecated HTML Tags	✔ Congratulations! Your page does not use HTML deprecated tags.
Google Analytics Test	✔ Congratulations! Your website is using the latest version of Google Analytics.
Favicon Test	✔ Congratulations! Your website appears to have a favicon. 
JS Error Checker	✔ Congratulations! There are no severe JavaScript errors on your web page.
Social Media Check	✔ Congratulations! Your website is connected successfully with social media using: Facebook;

SPEED OPTIMIZATIONS	
HTML Page Size Test	✔ Congratulations! The size of your web page's HTML is 21.96 Kb and is under the average web page's HTML size of 33 Kb. Faster loading websites result in a better user experience, higher conversion rates, and generally better search engine rankings.
HTML Compression/GZIP Test	✔ Congratulations! Your page is successfully compressed using **gzip compression** on your code. Your HTML is compressed from **121.51 Kb** to **21.96 Kb** (**82 % size savings**). This helps ensure a faster loading web page and improved user experience.
Site Loading Speed Test	✖ Your site loading time is around **14.00 seconds** and is over the average loading speed which is **5 seconds**. **HOW TO FIX SITE LOADING SPEED TEST** In order to resolve this problem you are advised to: • Minimize HTTP requests • Use Gzip compression • Use HTTP caching • Move all CSS style rules into a single, external and minified CSS file • Minify all JS files and, if possible, try combining them into a single external JS file • Include external CSS files before external JS files • Place your JS scripts at the bottom of your page • Optimize images • Reduce redirects • Reduce the number of plug-ins
Page Objects	✖ Your page has more than 20 http requests, which can slow down page loading. You can try reducing http requests through various methods such as using text instead of images, using css sprites, using data URIs instead of images, or combining several external files together into one. HTML Pages: 16; CSS Files: 43; Scripts: 193; Images: 62; Flash Files: 0;

Page Cache Test (Server Side Caching)	It does not appear that you are caching your pages. Cached pages serve up static html and avoid potentially time consuming queries to your database. It also helps lower server load by up to 80%. Caching most visibly benefits high traffic pages that access a database, but whose content does not change on every page view. Common caching methods include Alternative PHP Cache, Quickcache, and WP Super Cache (for Wordpress sites). Caching mechanisms also typically compress HTML, further reducing page size and load time. **HOW TO FIX PAGE CACHE TEST (SERVER SIDE CACHING)** In order to pass this test you are advised to use a caching mechanism for your pages. There are three methods which can be used to caching your web pages: 1. **Alternative PHP caching** - Alternative PHP Cache (APC) is an open source framework which caches data using intermediate PHP code. Most web programmers who are familiar with the PHP programming language can easily set up Alternative PHP Cache for your site. 2. **Quickcache** - Quickcache is a lightweight page caching solution which was formerly known as jpcache. Quickcache caches the page output rather than compiling the PHP page, making it a superior version of page caching to the Alternative PHP caching. Quickcache can be quickly downloaded from their website and can reduce your page load time up to 80%. 3. **WP Super Cache** - If you have a Wordpress website, WP Super Cache can be installed within seconds and without no programming knowledge.
Flash Test	Congratulations! Your website does not include flash objects (an outdated technology that was sometimes used to deliver rich multimedia content). Flash content does not work well on mobile devices, and is difficult for crawlers to interpret.

Image Expires Tag Test	Your site is not using expires headers for all of your images. An expires tag can help speed up the serving of your webpages for users that regularly visit your site and see the same images. Learn more about how to add expires headers to your images.
	
	HOW TO FIX IMAGE EXPIRES TAG TEST
	In order to reduce the number of HTTP requests, you can use the HTTP Expires header to set an expiration time for your images or any other content type. You can add the following lines into your **.htaccess** file:
	
	`<IfModule mod_expires.c>`
	`  ExpiresActive on`
	
	`  ExpiresByType image/jpg "access plus 1 month"`
	`  ExpiresByType image/jpeg "access plus 1 month"`
	`  ExpiresByType image/gif "access plus 1 month"`
	`  ExpiresByType image/png "access plus 1 month"`
	`</IfModule>`

JS Minification Test	Some of your website's JavaScript files are not minified! → https://ajax.googleapis.com/ajax/libs/prototype/1.7.1.0/prototype.js?ver=1.7.1 → https://ajax.googleapis.com/ajax/libs/sc ... aculous/1.9.0/scriptaculous.js?ver=1.9.0 → https://ajax.googleapis.com/ajax/libs/scriptaculous/1.9.0/effects.js?ver=1.9.0 → https://ajax.googleapis.com/ajax/libs/scriptaculous/1.9.0/builder.js → https://ajax.googleapis.com/ajax/libs/scriptaculous/1.9.0/effects.js → https://ajax.googleapis.com/ajax/libs/scriptaculous/1.9.0/dragdrop.js → https://ajax.googleapis.com/ajax/libs/scriptaculous/1.9.0/controls.js → https://ajax.googleapis.com/ajax/libs/scriptaculous/1.9.0/slider.js → https://ajax.googleapis.com/ajax/libs/scriptaculous/1.9.0/sound.js → https://albanylaser.ca/wp-content/plugin ... ck/modules/photon/photon.js?ver=20130122 → https://albanylaser.ca/wp-content/plugin ... -form-7/includes/js/scripts.js?ver=4.9.1 → https://secure.gravatar.com/js/gprofiles.js?ver=2017Decaa → https://albanylaser.ca/wp-content/plugins/jetpack/modules/wpgroho.js?ver=4.8 → https://albanylaser.ca/wp-content/plugin ... arousel/jetpack-carousel.js?ver=20170209 **HOW TO FIX JS MINIFICATION TEST** In order to pass this test you must minify all of your external JavaScript files. For this task you can use an online JS minifier like YUI Compressor, Closure Compiler or JSMin.
CSS Minification Test	Some of your website's CSS files are not minified! → https://albanylaser.ca/wp-content/plugin ... form-7/includes/css/styles.css?ver=4.9.1 → https://albanylaser.ca/wp-content/plugin ... blic/assets/css/settings.css?ver=2.0.9.1 → https://fonts.googleapis.com/css?family= ... ns%3A300%2C400%2C600%2C700%2C800&ver=4.8 → https://fonts.googleapis.com/css?family= ... 00%2C500%2C600%2C700%2C800%2C900&ver=4.8 → https://fonts.googleapis.com/css?family=Droid+Serif%3A400%2C700&ver=4.8 → https://albanylaser.ca/wp-content/themes/avada-child/style.css?ver=4.8 → https://fonts.googleapis.com/css?family= ... en+Sans+Condensed%3A300&subset=greek-ext → https://secure.gravatar.com/css/hovercard.css?ver=2017Decaa → https://reviews.localbusinessally.com/bu ... emplate_slug=standard&theme_name=classic → https://fonts.googleapis.com/css?family=Roboto:100,300,400,700 → https://fonts.googleapis.com/css?family=Open+Sans:400,600,700 → https://fonts.googleapis.com/css?family=Roboto:400,500 **HOW TO FIX CSS MINIFICATION TEST** In order to pass this test you must minify all of your external CSS files. For this task you can use an online CSS minifier like YUI Compressor or cssmin.js.
Nested Tables Test	Congratulations, your page does not use nested tables. This speeds up page loading time and optimizes the user experience.
Frameset Test	Congratulations! Your webpage does not use frames.
Doctype Test	Congratulations! Your website has a doctype declaration: → <!DOCTYPE html>

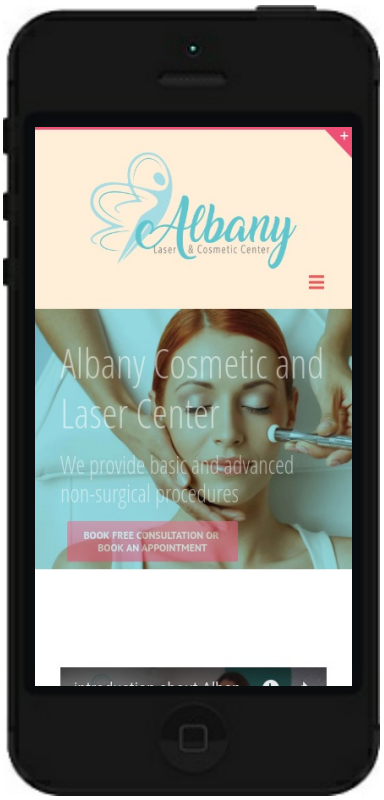

URL Redirects Checker	Your URL performed one redirect! While redirects are typically not advisable (as they can affect search engine indexing issues and adversely affect site loading time), one redirect may be acceptable, particularly if the URL is redirecting from a non-www version to its www version, or vice-versa. → from: http://albanylaser.ca/ to: https://albanylaser.ca/

SERVER AND SECURITY

URL Canonicalization Test	https://albanylaser.ca and https://www.albanylaser.ca resolve to the same URL.
HTTPS Test	Your website is successfully using https, a secure communication protocol over the Internet. Note: if your site relies primarily on ad income, be aware that using https may be detrimental to ad earnings.
Safe Browsing Test	This site is not currently listed as suspicious (no malware or phishing activity found).
Server Signature Test	Congratulations, your server signature is off.
Directory Browsing Test	Congratulations! Your server has disabled directory browsing.
Plaintext Emails Test	Congratulations! Your webpage does not include email addresses in plaintext.

MOBILE USABILITY

Media Query Responsive Test	Congratulations, your website uses media query technique, which is the base for responsive design functionalities.

Mobile Snapshot	

ADVANCED SEO

Microdata Schema Test	✔ Congratulations! Your website is using HTML Microdata specifications in order to markup structured data. → **Type:** WebSite → **Properties:** **url:** https://albanylaser.ca/ **name:** Albanylaser **potentialAction:** [object Object] → **Type:** Organization → **Properties:** **url:** https://albanylaser.ca/ **sameAs:** **name:** Albanylaser **logo:** http://albanylaser.ca/wp-content/uploads/2017/02/albany-laser-centre-LGlogo.png
Noindex Checker	✔ Your webpage does not use the noindex meta tag. This means that your webpage will be read and indexed by search engines.

Canonical Tag Checker	✔ Your page is using the canonical link tag. This tag specifies that the URL: https://albanylaser.ca is preferred to be used in search results. Please ensure that this specification is correct, as canonical tags are often hard-coded and may not always reflect the latest changes in a site's URL structure. → <link rel="canonical" href="https://albanylaser.ca/" />
Nofollow Checker	✔ Your webpage does not use the nofollow meta tag. This means that search engines will crawl all links from your webpage.
Disallow Directive Checker	✔ Your robots.txt file disallow the search engines access to some parts of your website. You are advised to check carefully if the access to these resources or pages must be blocked. → Disallow: /cgi-bin → Disallow: /wp-admin → Disallow: /wp-includes → Disallow: /wp-content → Disallow: /e/ → Disallow: /show-error-* → Disallow: /xmlrpc.php → Disallow: /trackback/ → Disallow: /comment-page-
SPF records checker	✔ Congratulations! Your DNS server is using an SPF record. This SPF record is listed below: → v=spf1 +a +mx +ip4:205.234.200.236 ~all
