Invitation

1st European Arab Engineers Forum
21-22 October 2011

Economic reform and opening the market in the oil and Gas countries show effects.

Sponsors

AHV NRW
Aussenhandelsverband Nordrhein-Westfalen e.V.

IHK im mittleren Ruhrgebiet zu Bochum

الإتحاد العربي للمساحة
UNION ARABE DES GEOMETRES TOPOGRAPHES

Under the auspices of minister president of xxx.

21 October, 2011

08:00 **Registration**

09:00 **Opening Ceremony**
Speaker-1
Speaker-1
Speaker-1

10:00 Special presentation

11:00 **Coffee Break**

11:30 Session-1
11:30 Workshop-1
12:15 Session-2
12:15 Workshop-2

13:00 **Lunch**

15:00 Session-3
15:00 Workshop-3
15:45 Session-4

16:30 **Coffee Break**

17:00 Session-5
17:00 Workshop-4

20:00 **Gala Dinner**

22 October, 2011

10:00 Session-6
10:00 Workshop-5
10:45 Session-7

11:30 **Coffee Break**

12:00 Session 8
Workshop-6

12:45 Women in engineering

13:30 **Lunch**

15:30 Podium Discussion

17:30 **Ending Ceremony**

23,24 October, 2011

Special Trips in Europe

1st European Arab Engineers Forum

The science and technology are the basis for economic and social development in the modern world. Globalization and the international economic struggle require great effort and progress in the areas of education and technical development. The EAEU has always endeavoured to ensure our award-winning members are supported by the best experts, teachers and international specialists.

Target groups

1 – Engineering Offics: This includes all engineering fields. As we know, in Europe there are a large number of European engineering firms, which have high level of "know-how." They are interested in working in the Arab world where huge projects are being planned and constructed. There are also Arab engineers who are very interested in cooperating with European engineering companies. In the next thirty years in the Arab countries, there will be a great demand for large projects in roads, airports, trains, construction, environment, energy, medicine, engineering, universities and training.

2 - Engineering Industries: This includes in particular small and medium-sized businesses. As we know, there is a young and modern Arab industry, which would benefit from the experience of European industry. Here lies the importance of this forum, which allows the opportunity for a smooth and constructive cooperation between the two industries. The Arab market is an attractive market for European industry. It has a strong purchasing power due to the availability of raw materials and natural resources.

3 - Universities: This includes public and private universities and training institutes. The forum gives an opportunity for Arab universities to integrate and cooperate with universities from Europe and around the world, especially in the field of scientific research.
